Lindsay Generators Project

Addendum/Clarification No. 1

The following additions and/or corrections shall become part of the Specifications for the subject project:

1. Question/Clarification.

Question 1:

Item 3 suggests environmental compliance. Is there any anticipated need for this? Can this item be omitted from the submittal?

Response:

Environmental compliance is included in the Phase 1 Scope of Work for this project; however, Phase 1 does not require preparation of CEQA or NEPA environmental documents. FEMA has issued a Record of Environmental Consideration (REC) determining that the Phase 1 design activities are Categorically Excluded (CATEX A4 and A7) as non-ground-disturbing work.

Therefore, Item 3 must remain in the consultant's proposal, but only to the extent of demonstrating experience with environmental compliance and describing their general approach for supporting environmental requirements during the design and permitting process.

For the purposes of this RFQ, proposers should provide:

- A summary of relevant experience preparing environmental documentation for CEQA, NEPA, and HMGP-funded projects.
- A brief description of their approach to addressing environmental compliance needs associated with this project, consistent with FEMA's CATEX determination for Phase 1.

Full environmental analysis is not required at this time and will occur prior to Phase 2 construction activities.

This completes the items included in this Addendum/Clarification No. 1 for the City of Lindsay, **Lindsay Generators Project**. This Addendum cover page shall be signed and submitted with RFQ submittal.
