## Executive Summary

The City of Lindsay engaged Willdan Financial Services (Willdan) to determine the full costs incurred by the City to support the various activities for which the City charges user fees. Due to the complexity and the breadth of performing a comprehensive review of fees, Willdan employed three methodologies to identify the full costs of individual fee and program activities. This report and the appendices herein identify reasonable full cost recovery for City services.

The recommended fees identified herein are either at or less than full cost recovery as determined through discussion with departmental staff.

## User Fee Background

## Background

Local governments adopt user fees to fund programs and services that provide a direct benefit to an individual or a group of individuals. Specifically, user fees may be adopted by local government agencies to fund programs and services that provide only a limited benefit or no direct benefit to the community as a whole. As cities struggle to maintain levels of service cities have implemented cost-recovery targets to continue to provide programs and services that have a limited impact to the community at large.

Unlike most revenue sources, cities have more control over the level of user fees they charge to recover costs, or the subsidies they institute. To the extent that governments use general tax monies to provide individuals with private benefits and not require them to pay the full cost of the service (and, therefore, receive a subsidy), the government is limiting funds that may otherwise be available to provide other community-wide benefits. In effect, the local government can decide to use community funds to pay for private benefits to certain individuals by electing to recover less than the full cost to provide these programs and services.

Fees in California are required to conform to the statutory requirements of the California Constitution, Proposition 218, Proposition 26, and the California Code of Regulations. The Code also requires that the City Council adopt fees by either ordinance or resolution, and that any fees in excess of the estimated total cost of rendering the related services must be approved by a popular vote of two-thirds of those electors voting because the charge would be considered a tax and not a fee. The recommended fees identified herein are either at or less than full cost recovery.

## California User Fee History

Proposition 13 (1978) established the era of revenue limitation in California local government. In subsequent years, the state saw a series of additional limitations to local government revenues. Proposition 4 (1979) defined the difference between a tax and a fee: a fee can be no greater than the cost of providing the service; and Proposition 218 (1996) further limited the imposition of taxes for certain classes of fees. As a result, cities were required to secure a supermajority vote in order to enact or increase taxes. Compounding this limitation, the State of California took a series of actions in the 1990's and 2000's to improve the State's fiscal situation-at the expense of local governments. As an example, in 2004-05, the Educational Revenue Augmentation Funds ("ERAF") take-away of property taxes and the reduction of Vehicle License Fees have severely reduced local tax revenues.

In addition, on November 2, 2010, California voters approved Proposition 26, the "Stop Hidden Taxes Initiative", which is aimed at defining "regulatory fees" as a special tax rather than a fee, thus requiring approval by two-thirds vote of local voters. These regulatory fees are typically intended to mitigate the societal and environmental impacts of a business or person's activities. Proposition 26 contains seven categories of exceptions. The vast majority of fees that cities would seek to adopt as part of a user fee study will most likely fall into one or more of these exemptions.

The historical trend toward revenue limitation for local governments has raised the need for cities to reduce potential subsidies provided by the General Fund and focus on recovering the cost of those programs and services providing primarily providing a limited private benefit to certain individuals from the individual fee payers benefiting from those programs and services.

## Additional Policy Considerations

The recent trend for municipalities is to update their fee schedules to reflect the actual costs of certain public services primarily benefitting the users of those services. User Fees recover costs associated with the provision of specific services benefiting the user, thereby reducing the use of General Fund monies for such purposes.

In addition to collecting the direct cost of labor and materials associated with processing and administering user services, it is common for local governments to recover reasonable support costs. Support costs are those costs relating to a local government's central service departments that are properly allocable to the local government's operating departments. Central service support costs were incorporated using the resulting indirect overhead percentages determined through the Cost Allocation Plan. This plan was developed prior to the User Fee study to determine the burden placed upon central services by the operating departments in order to allocate a proportionate share of central service cost.

As labor effort and costs associated with the provision of services fluctuate over time, a significant element in the development of any fee schedule is that it has the flexibility to remain current. Therefore, it is recommended that the City include an inflationary factor in the resolution adopting the fee schedule to allow the City Council, by resolution, to annually increase or decrease the fees in instances where a fully updated comprehensive user fee study cannot be completed.

The City may employ many different inflationary factors. The most commonly used inflator is some form of the Consumer Price Index (CPI) as it is widely well known and accepted. A similar inflator is the implicit price deflator for GDP, which is much like the CPI except that while the CPI is based on the same "basket" of goods and services every year, the price deflators' "basket" can change year to year. Since the primary factor for the cost of a City's services is usually the costs of the personnel involved, tying an inflationary factor that connects more directly to the personnel costs can be suitable if there is a clear method, or current practice of obtaining said factor.

Each City should use an inflator that they believe works the best for their specific situation and needs. It is also recommended that the City perform this internal review annually with a comprehensive review of services and fees performed every three to five years, which would include adding or removing fees for any new or eliminated programs/services.

## Study Objective

As the City of Lindsay seeks to efficiently manage limited resources and adequately respond to increased service demands, it needs a variety of tools. These tools provide assurance that the City has the best information and the best resources available to make sound decisions, fairly and legitimately set fees, maintain compliance with state law and local policies, and meet the needs of the City administration and its constituency. Given the limitations on raising revenue in local government, the City recognizes that a User Fee Study is a very cost-effective way to understand the total cost of services and identify potential fee deficiencies. Essentially, a User Fee is a payment for a requested service provided by a local government that primarily benefits an individual or group.

The total cost of each service included in this analysis is based on the full cost of providing City services, including direct salaries and benefits of City staff, direct departmental costs, and indirect costs from central service support department. This study determines the full cost recovery fee for the City to provide each service; however, each fee is set at the City's discretion, up to $100 \%$ of the total cost, as specified in this report.

The principal goal of the study was to help the City determine the full cost of the services that the City provides. In addition, Willdan established a series of additional objectives including:

- Developing a rational basis for setting fees
- Identifying subsidy amount, if applicable, of each fee in the model
- Ensuring compliance with State law
- Developing an updatable and comprehensive list of fees
- Maintaining accordance with City policies and goals

The study results will help the City better understand its true costs of providing services and may serve as a basis for making informed policy decisions regarding the most appropriate fees, if any, to collect from individuals and organizations that require individualized services from the City.

## Scope of the Study

The scope of this study encompasses a review and calculation of the user fees charged by the following Lindsay departments and fee groups:

- Finance \& Administration
- Building
- Planning
- Public Safety
- Recreation - Wellness and Aquatic Center

The study involved the identification of existing and potential new fees, fee schedule restructuring, data collection and analysis, orientation and consultation, quality control, communication and presentations, and calculation of individual service costs (fees) or program cost recovery levels.

## Aim of the Report

The User Fee Study focused on the cost of City services, as City staff currently provides them at existing, known, or reasonably anticipated service and staff levels. This report provides a summary of the study results, and a general description of the approach and methods Willdan and City staff used to determine the recommended fee schedule.

## Project Approach and Methodology

## Conceptual Approach

The basic concept of a User Fee Study is to determine the "reasonable cost" of each service provided by the City for which it charges a user fee. The full cost of providing a service may not necessarily become the City's fee, but it serves as the objective basis as to the maximum amount that may be collected.

The standard fee limitation established in California law for property-related (non-discretionary) fees is the "estimated, reasonable cost" principle. In order to maintain compliance with the letter and spirit of this standard, every component of the fee study process included a related review. The use of budget figures, time estimates, and improvement valuation indicates reliance upon estimates for some data.

## Fully Burdened Hourly Rates

The total cost of each service included in this analysis is primarily based on the Fully Burdened Hourly Rates (FBHRs) that were determined for City personnel directly involved in providing services. The FBHRs include not only personnel salary and benefits, but also any costs that are reasonably ascribable to personnel. The cost elements that are included in the calculation of fully burdened rates are:

- Salaries \& benefits of personnel involved
- Operating costs applicable to fee operations
- Departmental support, supervision, and administration overhead
- Internal Service Costs charged to each department
- Indirect City-wide overhead costs calculated through the Cost Allocation Plan

An important factor in determining the fully burdened rate is in the calculation of productive hours for personnel. This calculation takes the available workable hours in a year of 2,080 and adjusts this figure to account for calculated or anticipated hours' employees are involved in non-billable activities such as paid vacation, sick leave, emergency leave, holidays, and other considerations as necessary. Dividing the full cost by the number of productive hours provides the FBHR.

The FBHRs are then used in conjunction with time estimates, when appropriate, to calculate a fees' cost based on the personnel and the amount of their time that is involved in providing each service.

## Summary Steps of the Study

The methodology to evaluate most User Fee levels is straightforward and simple in concept. The following list provides a summary of the study process steps:

| Data Analysis | Building Cost Layers | Set Fees |
| :---: | :---: | :---: |
| Department Interviews | Direct Services | Define the Full Cost of <br> Services |
| Time Estimates | Indirect Services | Set Cost Recovery Policy |
| Labor Costs | Department Overhead |  |
| Cost Allocation Plan |  |  |
|  |  |  |

## Allowable Costs

This report identifies three types of costs that, when combined, constitute the fully burdened cost of a service (Appendix A). Costs are defined as direct labor, including salary and benefits, departmental overhead costs, and the City's central services overhead, where departmental and central service overhead costs constitute support costs. These cost types are defined as follows:

- Direct Labor (Personnel Costs): The costs related to staff salaries for time spent directly on fee-related services.
- Departmental Overhead: A proportional allocation of departmental overhead costs, including operation costs such as
 supplies and materials that are necessary for the department to function.
- Central Services Overhead: These costs, detailed in the City's Cost Allocation Plan, represent services provided by those Central Services Departments whose primary function is to support other City departments.

## Methodology

The three methods of analysis for calculating fees used in this report are the:
Case Study Method (Standard Unit Cost Build-Up Approach): This approach estimates the actual labor and material costs associated with providing a unit of service to a single user. This analysis is suitable when City staff time requirements do not vary dramatically for a service, or for special projects where the time and cost requirements are easy to identify at the project's outset. Further, the method is effective in instances when a staff member from one department assists on an application, service or permit for another department on an as-needed basis. Costs are estimated based upon interviews with City staff regarding the time typically spent on tasks, a review of available records, and a time and materials analysis.

Programmatic Approach: In some instances, the underlying data is not available or varies widely, leaving a standard unit cost build-up approach impractical. In addition, market factors and policy concerns (as opposed to actual costs) tend to influence fee levels more than other types of services. Willdan employed a different methodology where appropriate to fit the programs' needs and goals. Typical programmatic approach cases are facility use fees, penalties, and instances where a program cost is divided over the user base to obtain a per applicant cost for shared cost services.

Valuation Based Fees: This manner of collection is used when the valuation of the improvement can be used as a proxy for the amount of effort it would take for City staff to complete the service provided. More specifically, this approach is commonly used for certain User Fees in the Building Division. It is generally accepted that as a project's size scales up, the cost of the project increases, and the amount of effort needed to review and inspect also increases. Using a valuation-based fee provides for a system that can adjust as project sizes scale. Land is not included in the valuation.

## Quality Control/Quality Assurance

All study components are interrelated, thus flawed data at any step in the process will cause the ultimate results to be inconsistent and unsound. The elements of our Quality Control process for User Fee calculations include:

- Involvement of knowledgeable City staff
- Clear instructions and guidance to City staff
- Reasonableness tests and validation
- Normalcy/expectation ranges
- FTE balancing
- Internal and external reviews
- Cross-checking

## Reasons for cost increases/decreases over current fees

Within the fee tables in Appendix $\mathbf{C}$, the differences identified between the full costs calculated through the study and the fee levels currently in effect. The reasons for differences between the two can arise from a number of possible factors including:

- Previous fee levels may have been set at levels less than full cost intentionally, based on policy decisions
- Staffing levels and the positions that complete fee and service activity may vary from when the previous costs were calculated
- Personnel and materials costs could have increased at levels that differed from any inflationary factors used to increase fees since the last study
- Costs that this study has identified as part of the full cost of services may not have been accounted for in a previous study
- Departmental overhead and administration costs
- Indirect overhead from the Cost Allocation Plan
- Changes in processes and procedures within a department, or the City as a whole

## City Staff Contributions

As part of the study process, Willdan received tremendous support and cooperation from City staff, which contributed and reviewed a variety of components to the study, including:

- Budget and other cost data
- Staffing structures
- Fee and service structures, organization, and descriptions
- Direct and indirect work hours (billable/non-billable)
- Time estimates to complete work tasks
- Frequency and current fee levels
- Review of draft results and other documentation

A User Fee Study requires significant involvement of the managers and line staff from the departmentson top of their existing workloads and competing priorities. The contributions from City staff were critical to this study. We would like to express our appreciation to the City and its staff for their assistance, professionalism, positive attitudes, helpful suggestions, responsiveness, and overall cooperation.

## Lindsay User Fees

## Cost Recovery

The cost recovery models, by department and or division fee type, are presented in detail in Appendix $\mathbf{C}$. Full cost recovery is determined by summing the estimated amount of time each position (in increments of minutes or hours) spends to render a service. Time estimates for each service rendered were predominately determined by Willdan and City Staff through a time and materials survey conducted for each department/division fee included in the study. The resulting cost recovery amount represents the total cost of providing each service. The City's current fee being charged for each service, if applicable, is provided in this section, as well, for reference.

It is important to note that the time and materials survey used to determine the amount of time each employee spends assisting in the provision of the services listed on the fee schedule is essential in identifying the total cost of providing each service. Specifically, in providing services, a number of employees are often involved in various aspects of the process, spending anywhere from a few minutes to several hours on the service.

The principal goal of this study was to identify the cost of City services, to provide information to help the City make informed decisions regarding the actual fee levels and charges.

In setting the level of full cost recovery for each fee, one should consider whether the service solely benefits one end user or the general community. City staff assumes the responsibility to develop specific fee level recommendations to present to the City Council for their final review and ultimate approval. The City of Lindsay is under specific guidance to develop and present to Lindsay City Council a fee schedule that meets the recommendations of CA State Auditors Report 2020-805.

## Subsidization

Recalling the definition of a user fee helps guide decisions regarding subsidization. The general standard is that individuals (or groups) whom receive a wholly private benefit should pay $100 \%$ of the full cost of the services. In contrast, services that are $100 \%$ public benefit should be funded entirely by the general fund's tax dollars. Many services fall into the range between these two extremes.

Further complicating the decision, opponents of fees often assert that the activities subject to the fees provide economic, cultural, "quality of life," or other community benefits that exceed the costs to the City. It is recommended the City consider such factors during its deliberations regarding appropriate fee levels.

Of course, subsidization can be an effective public policy tool, since it can be used to reduce fees to encourage certain activities (such as compliance inspections to ensure public safety) or allow some people to be able to afford to receive services they otherwise could not at the full cost. In addition, subsidies can be an appropriate and justifiable action, such as to allow citizens to rightfully access services, without burdensome costs.

Despite the intent, it is important for the City and public to understand that subsidies must be covered by another revenue source, and in most instances by the General Fund. In such instances therefore, funds provided by the general taxpayer may potentially be used to help fund and provide private benefits to an individual or group. Also in such instances, other City services may not receive those General funds that are otherwise spent to provide such subsidies.

## Impact on Demand (Elasticity)

Economic principles of elasticity suggest that increased costs for services (higher fees) will eventually curtail the demand for the services; whereas lower fees may spark an incentive to utilize the services and encourage certain actions. Either of these conditions may be a desirable effect to the City. However, the level of the fees that would cause demand changes is largely unknown. The cost of service study did not attempt to evaluate the economic or behavioral impacts of higher or lower fees; nevertheless, the City should consider the potential impacts of these issues when deciding on fee levels.

## Summary

If the City's principal goal of this study were to maximize revenues from user fees, Willdan would recommend setting user fees at $100 \%$ of the full cost identified in this study. However, we understand that revenue enhancement is not the only goal of a cost of service study, and sometimes full-cost recovery is not needed, desired, or appropriate. Other City and departmental goals, City Council priorities, policy initiatives, past experience, implementation issues, and other internal and external factors may influence staff recommendations and City Council decisions. In this case, the proper identification of additional services (new or existing services) and creation of a consistent and comprehensive fee schedule was the primary objective of this study. City staff has reviewed the full costs and identified the "recommended fee levels" for consideration by City Council. The attached appendices exhibit these unit fees individually.

The preceding sections provide background for each department or division and the results of this study's analysis of their fees. For the full list of each fee's analysis, refer to Appendix $C$ of this report.

## Finance \& Administration

The Finance department is responsible for general ledger accounting, banking and investment, debt management, governmental accounting and reporting, accounts payable and accounts receivable, and utility billing.

## Analysis

Willdan individually reviewed the services associated with the Finance Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Finance services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and pro-rata share of departmental costs, including indirect costs for City Central Services. Willdan then compared the calculated full cost against the current fee amount to determine, if charged, whether the current fee is recovering costs associated with the requested service. The analysis found that a few of the current fees are set below the cost of service. The suggested fee amounts being recommended are detailed in Appendix C with some levels of subsidy suggested to remain. As a result, there would be:

- An increase to 4 fees;
- 1 new Credit Card Convenience fee would be added, and;
- 11 fees would remain as currently set.

## Building

The City Services department manages the physical condition of the community and its environment. While some of the work City Services may do is out of sight because it deals with underground infrastructure or is done at the treatment plant, much of the work is either in plain view including street repair projects and can be experienced in the daily life of City residents for example through water taste and quality.

The City Services Department is comprised of the following sub departments: maintenance, streets, parks, building, code enforcement, planning, engineering, water, wastewater, storm drain utilities, refuse services, and special districts.

## Analysis

Willdan individually reviewed the services associated with Building. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Building Services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. The analysis found that the current fees are subsidizing the cost of service. It is recommended that the City set Building fees at cost recovery levels as detailed in Appendix C for each specific fee, with many fees increasing to achieve full cost recovery. As a result, there would be:

- an increase to 28 fees;
- 9 fees would decrease;
- 7 new fees would be added, including a General Plan Update fee;
- 8 fees would remain as currently set, and;
- the average estimated fee increase for Building would be at around $20 \%$ for flat fee services.

In addition to the above referenced fees listed under Building, the Building Permit fees are also provided by this Department. For the Building Permit fees, valuation is used as a proxy for measuring the amount of effort needed to provide services on a case-by-case basis. This method is an industry standard widely used by other jurisdictions to evaluate the cost of providing service. It is generally understood that the larger and more complex a project is, more time and effort that is required to provide code compliance services. Project valuation also follows that trend, and so by using a combination of either project valuation or historical revenue figures along with a multiplier or cost recovery analysis for historical and anticipated future trends, current cost recovery along with variability in charges due to project type and scale is determined. The result of the cost analysis completed for the Building Permit program found that the program is currently operating at $28 \%$ cost recovery. It is suggested that the fees be increased to raise cost recovery to $100 \%$.

## Planning

The Lindsay Department of Planning and Economic Development is involved in almost every project as it follows City Council directives in supporting businesses, city services, parks, water, wastewater and curb and gutter; creating a better business community for the City; participating in the sorting of forms required to establish business in the community; encouraging interaction between the Chamber of Commerce; and highlighting all the City can offer to businesses.

## Analysis

Willdan individually reviewed the services associated with the Planning Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of Planning Services relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. The analysis found that the current fees are subsidizing the cost of most services. It is recommended that the City set Planning fees at cost recovery levels as detailed in Appendix $\mathbf{C}$ for each specific fee to achieve full cost recovery for services. As a result, there would be:

- an increase to 32 fees;
- 1 fee would decrease;
- 9 new fees would be added, and;
- the average estimated fee increase for existing Planning services would be at around $60 \%$.

## Public Safety

Under the roof of the Lindsay Department of Public Safety you will find three separate but well-aligned components. Public Safety encompasses full-time police and fire personnel, along with animal control services. An entity that is closely tied to all three is the records unit, falling primarily under the police umbrella. To date our law enforcement personnel still act as firefighters, in the evening and weekend hours, when dedicated fire personnel are not on duty. The duties of police include identifying and solving problems throughout the City, maintaining a proactive approach on crime and ensuring the safety and quality of life of those that live, work, or worship in the community. The City's law enforcement staff embraces a great working relationship with residents and the Lindsay Unified School District as well. The Public Safety Department prides itself on the small-town relationships established and take every effort to develop community-oriented policing networks.

Fire protection services include just that, responding to fire emergencies, along with assisting with medical aid responses. A proactive approach is also taken on weed abatement and other measures to prevent or at least minimize fire damage and maintain safety of our residents.

Animal control service responsibilities include patrolling the community for stray animals or municipal code violations related to animal control and educating animal owners. Those captured are provided with humane treatment and proper sheltering, until the owner can be located, or the animal can be adopted.

## Analysis

Willdan individually reviewed the services associated with the Public Safety Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The services included in Public Safety are a mixture of fines and user fees. Fines are set to deter the listed activities, and the analysis of the user fees relied primarily upon a standard unit cost build-up approach, whereby we determined the reasonable cost of each fee occurrence using staff time to recover the direct cost of staff and the pro-rata share of departmental costs, including indirect costs for City Central Services. The analysis found that the current fees are subsidizing the cost of most cost-based services. It is recommended that the City set Public Safety fees at cost recovery levels as detailed in Appendix C for each specific fee to achieve greater cost recovery. As a result, there would be:

- an increase to 10 fees;
- 2 fees would decrease, and;
- 31 fees and penalties would remain as currently set.

## Recreation - Wellness and Aquatic Center

The Wellness Center offers a variety of services in the areas of aquatics, fitness, and recreation. The Wellness Center boasts a state-of-the-art eight-lane swimming pool and a sloped-entry kiddie pool area; it offers pool rental to the community and serves as the home of the Lindsay High School Swim Team as well as the Skimmers, a local competitive youth swim team. Various fitness and exercises classes are also offered, as well as a full gym with various exercise machines and a free weights area. The Wellness Center is also grateful to count Pro-PT Physical Therapy and OMNI Family Health as valued tenants providing additional health resources to the Lindsay community.

In addition to the offerings found at the Wellness Center, the Department of Recreation oversees other facilities around town such as the Olive Bowl, Harvard Park, and the Lindsay Sports Complex. Special community events include Summer Night Lights and the Annual Salute to Service Run/Walk.

## Analysis

Willdan individually reviewed the services associated with the Recreation - Wellness and Aquatic Center Department. The review also consisted of an evaluation of existing services in an effort to update the fee schedule.

The analysis of most Recreation programs encompassed facility rentals and other associated recreation services. The fee for use of government owned facilities and property can be set discretionally by the City per Proposition 26 based on market or policy factors. The cost of acquisition, maintenance, repair, and upgrade to the City and subsequently the community can be offset by rental or facility use fee revenue. As such fees should be set using the knowledge of activity use for the facilities, policy desires of the City, and market factors when desirable. It is generally accepted that some Recreation programs provide a measure of public benefit to the residents and City as a whole. In addition, cities generally want to ensure that their programs and services remain affordable to the community at large, and that the programs remain competitive with surrounding jurisdictions and private businesses.

An analysis of the City's Recreation Services was done to determine the reasonable cost of each fee occurrence using direct service staff time to recover the direct cost of that staff using their full burdened hourly rates. A cost analysis was also completed for the Wellness Center which found that the program is currently operating at approximately a $70 \%$ cost recovery.

The suggested fee amounts that are being recommended are to achieve greater cost recovery and are detailed in Appendix C. As a result, there would be:

- An increase to 29 fees;
- A decrease to 1 fee;
- 8 new fees would be added, and;
- 6 fees would remain as currently set.

## Appendix A - Total Allowable Cost to be Recovered

Below are the total allowable costs that may be recovered through User Fees; however, only a percentage of the total cost is realized as staff doesn't just work on services related to User Fees, but also works on an array of other City functions during the operational hours of the City. The amounts listed below will not reconcile to City budgets as costs that should not be included in overhead for personnel in the application of determining fully burdened hourly rates were excluded. Examples of these costs are capital, debt, monetary transfers, passthrough contract costs, and any other costs that is charged directly to the service requestor.

## City of Lindsay - User Fee

## Overhead Rate Calculations

| Department | Salaries and Benefits | Department Operational Costs | Direct Overhead \% | Indirect <br> Allocation \% |
| :---: | :---: | :---: | :---: | :---: |
| 101: CITY MANAGER | 108,410 | 95,800 | 88\% | 0\% |
| 101: FINANCE | 141,993 | 130,078 | 92\% | 0\% |
| 101: COM DEV | 367,615 | 69,153 | 19\% | 11\% |
| 101: PUBLIC SAFETY | 2,998,452 | 1,074,906 | 36\% | 10\% |
| 101: CITY SERVICES | 345,350 | 145,072 | 42\% | 9\% |
| 101: STREETS | 249,217 | 67,914 | 27\% | 11\% |
| 101: PARKS | 161,891 | 77,351 | 48\% | 11\% |
| 400: WELLNESS CENTER | 370,161 | 301,786 | 82\% | 10\% |
| 552: WATER | 564,330 | 473,762 | 84\% | 9\% |
| 553: SEWER | 381,726 | 275,218 | 72\% | 9\% |
| 554: REFUSE | 234,659 | 58,064 | 25\% | 8\% |

## Appendix B - Fully Burdened Hourly Rates

Below are fully burdened hourly rates of staff positions that provide for the services detailed in Appendix C. The FBHRs were used to determine the full cost of each service. They include the salary and benefit costs for each position as well as all applicable overhead amounts for each position. For positions in central service departments, such as the City Clerk and Finance, what is shown is the salary and benefit rate only, as the overhead of central service departments is recovered through the cost allocation plan. When a central service department position works on a fee or project in the purview of an operating department, the overhead rates of the operating department (shown in Appendix A) will be applied to that central service positions' salary and benefit rate for full cost recovery. For any user fee service request that is outside the scope of the fees detailed in Appendix C, or for services for which there is no fee currently set, the City can charge up to the full cost of the FBHR for personnel involved.

## Appendix C - Cost Recovery Analysis

The following tables provide the results of the analysis, resulting full cost recovery amount, and recommended fees. For fees in which the full cost, existing fee and suggested fee is listed as "NA", the amount or percentage was not calculable based on cost data or variable fee structure. This is most common when either the current or the suggested fee includes a variable component that is not comparable on a one to one basis, a full cost was not calculated (for penalties and fines), or when there is not a current fee amount to compare against.

FINANCE \& ADMINISTRATION FEES

| \# | Description | Current Fee/Charge | Notes |
| :---: | :---: | :---: | :---: |
| 1 | Application Fee | \$30.00 | One Time Fee |
| 2 | CASP FEE | \$4.00 | Renewal |
| 3 | Classification A | \$10 minimum $\$ 30$ maximum | Gross Receipts/Quarterly |
| 4 | Classification B | \$10 minimum $\$ 50$ maximum | Gross Receipts/Quarterly |
| 5 | Classification C | \$10 minimum - <br> \$217 maximum | Gross Receipts/Quarterly |
| 6 | Classification D | \$10 minimum \$124 maximum | Gross Receipts/Quarterly |
| 7 <br> 8 | Farmers Market | \$30.00 | Annual |
| 8 | Vehicles with no fixed Location | \$15.00 | Semi-Annual |
| 9 | Contractors | \$50.00 | Semi-Annual |
| 10 | Sub-Contractors | \$30.00 | Semi-Annual |
| 11 | ONE Day | \$7.00 | Special Events |
| 12 | Department Inspection Fee |  | New Business, Applicant \& Location requires Fire \& Building inspection fee |
| 13 | Fire | \$100.00 |  |
| 14 | Building | \$100.00 |  |
| 15 | Credit Card Convenience Fee | New |  |
